WHERE CAN YOU FIND THE MOST IMPORTANT SUMMARY INFORMATION IN ONE PLACE?

In the *Moodle* course “**Mokslinė komunikacija**” (“Scientific Communication”), you will find the most important information on the following topics:

- Scientific activities and their organization at Kauno kolegija Higher Education Institution
- Planning the research process: what do you need to know before starting your research?
- Data, scientific and other sources required for research, and how to find them
- Publishing research results: how to choose a scientific journal or publisher?
- Publishing research results (article)
- Publishing research results (monograph)
- Evaluation of scientific and art activity results
- Registration of scientific and art activity results, compilation of publication lists
- Dissemination of research results: how to choose a scientific conference?
- Dissemination of research results: researcher profile, identifiers, social networks
- Ethics of research and publishing, quality criteria for scientific publishing
- Open access and requirements for publishing research results
- Copyright, publishing agreements, and licenses

The course also includes **a glossary of scientific terms**.

All members of the Kauno kolegija Higher Education Institution community with an institutional email address are eligible to join this course.
